TokNav T40 Gnss Receiver Incl. Internal Uhf-gsm Modem

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

TokNav T40 Gnss Receiver Incl. Internal Uhf-gsm Modem

Manufacturer: TOKNAV
Model: GEN-TOK-6396095
Availability: In Stock

Description

The TokNav T40 is a rugged, IP68-rated GNSS RTK receiver built for high-precision land surveying. It combines multi-constellation satellite tracking with a dual-laser camera system, letting surveyors measure hard-to-reach points via laser targeting instead of physically occupying every point. Hot-swappable batteries give all-day field runtime, and it includes a built-in radio modem for RTK correction data.
