TokNav T5 Gnss Receiver Incl. Internal Uhf-gsm Modem

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Manufacturer: TOKNAV
Model: GEN-TOK-9705632
Availability: In Stock

Description

The TokNav T5 is a compact, rugged handheld GNSS RTK receiver built for topographic survey, construction layout, and control-point work. It uses a 1408-channel multi-constellation engine (GPS/GLONASS/BDS/Galileo/QZSS/SBAS) with a tilt-compensation IMU giving measurement up to 60 degrees of tilt, so surveyors don't need to level the pole. It includes a built-in UHF radio plus 4G/NTRIP connectivity for correction data, runs over 16 hours on its internal battery, and is rated IP65-IP68 for outdoor field durability.
