Product Overview

TokNav T50Pro Gnss Receiver Incl. Internal Uhf-gsm Modem

Manufacturer: TOKNAV
Model: GEN-TOK-5687023
Availability: In Stock

Description

The TokNav T50Pro is a compact, palm-sized GNSS RTK receiver built for survey and stakeout work. It tracks all major satellite constellations across 1408 channels and adds a built-in photogrammetry camera with augmented-reality stakeout guidance, letting surveyors capture accurate points from a photo instead of physically standing on each spot. It is rated IP68 for dust/water resistance and runs over 16 hours on its battery.
