Sinognss P8h Gnss Gis Rtk Tablet with External Antennae Kit

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Sinognss P8h Gnss Gis Rtk Tablet with External Antennae Kit

Manufacturer: SINOGNSS

Model: SUR-SIN-474077

Availability: In Stock

Description

The SinoGNSS P8H is a rugged, IP67-rated Android tablet built for GIS data collection and RTK surveying in the field. This kit pairs the P8H with an external GNSS antenna accessory, which improves signal reception and positioning accuracy in situations where the tablet's built-in antenna is limited by obstructions or multipath interference, useful for demanding topographic and cadastral survey work.
