Reed R7800 Thickness Gauge, Coating, 1250um/50mils

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed R7800 Thickness Gauge, Coating, 1250um/50mils

Manufacturer: ERP Manufacturer #8

Model: MEA-REE-03008

Availability: In Stock

Description

This coating thickness gauge is designed for non-invasive coating thickness measurements. The R7800 features zero or two point calibration, user adjustable high/low alarms and a USB interface to further analyse results in the included software. Features Automatically detects ferrous and non-ferrous substrates Easy-to-read color LCD display 360° screen rotation allows users to view measured readings from any angle Durable gauge and probe construction Zero and two-point calibration ensures measurement accuracy Single or multi-point mode allows a user to set tolerances and quickly identify whether a coating passes or fails Tri-color LEDs quickly indicate when measurements are below (red...
