Reed R8800 Voltage/Current Calibrator, MA

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed R8800 Voltage/Current Calibrator, MA

Manufacturer: ERP Manufacturer #8

Model: MEA-REE-01028

Availability: In Stock

Description

This voltage/current calibrator calibrates and measures process signals. The R8800 is able to power and measure a two-wire current loop and features an easy-to-read backlit LCD display for use in dimly lit environments. Features Measure and calibrate current signals Power or measure two-wire current loops Easy-to-read backlit LCD display Cat. III 600V safety rating Ideal Applications for the REED R8800 Research and development Semiconductor and process control Calibrating voltage input signal conditioners Testing valve positioners and field testing loop powered isolators What's included with the REED R8800 Voltage/Current Calibrator Test Leads Soft Carrying Case Batter...
