Reed R2810 Thermocouple Calibrator, Temperature

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed R2810 Thermocouple Calibrator, Temperature

Manufacturer: ERP Manufacturer #8

Model: MEA-REE-01034

Availability: In Stock

Description

This thermocouple calibrator is capable of sourcing and measuring 8 different types of thermocouples. The R2810 features a easy-to-read LCD display, basic accuracy of 0.05% and includes the essentials to test and calibrate your temperature sensors. Features Source and measure 8 thermocouple types, including R, S, B, E, K, J, T, N; and volts Basic accuracy of 0.05% Internal cold junction compensation Easy to read 6-digit LCD display Zero adjustment button User selectable unit of measure (°F/°C) Low battery indicator and auto shut off REED R2810 Applications The REED R2810 can be used to calibrate thermocouple probes. The accuracy of thermocouple temperatures are an important factor ...
