Reed SD-4214 Anemometer/Thermometer, Hot Wire, Data Logger

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed SD-4214 Anemometer/Thermometer, Hot Wire, Data Logger

Manufacturer: ERP Manufacturer #8

Model: MEA-REE-01078

Availability: In Stock

Description

This SD series datalogging thermo-anemometer measures air velocity, air temperature and has a built-in contact thermometer. The SD-4214 features user selectable sampling rates from 1 to 3600 seconds. Using an SD card (max 16Gb) a user can select a desired sampling rate and quickly generate an Excel file without the use of software. Optional accessories include a tripod and AC adapter for continuous long-term monitoring. Optional PC software also allows a user to track live measurements. Features Measures air velocity (fpm, m/s, kph, mph and knots) and air temperature Contact temperature measurement with type J/K thermocouple option Thermistor sensor for fast air temperature readings Hot...
