Reed R2020 IR Thermometer, Video Data Logger W/ Sd Card

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed R2020 IR Thermometer, Video Data Logger W/ Sd Card

Manufacturer: Reed Instruments

Model: MEA-REE-00802

Availability: In Stock

Description

The REED R2020 is an infrared thermometer that pairs standard non-contact temperature measurement (up to about 2200C, 50:1 distance-to-spot ratio) with a built-in camera for capturing photos and video of the target area. It logs readings with timestamps to onboard memory, expandable via a micro SD card, and can transfer data to a PC over USB without extra software. It also includes a Type K thermocouple input and can report ambient temperature, humidity, dew point, and wet bulb readings.
