Reed R6000 Thermo-Hygrometer, Indoor/Outdoor Desktop W/Clock

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed R6000 Thermo-Hygrometer, Indoor/Outdoor Desktop W/Clock

Manufacturer: Reed Instruments

Model: MEA-REE-00857

Availability: In Stock

Description

The Reed R6000 is a desktop indoor/outdoor thermo-hygrometer with a built-in clock, showing indoor temperature and humidity alongside outdoor readings from a wired sensor with roughly a 6-foot cable. Indoor temperature covers about -10 to 50C, with humidity measured from 20-95% RH shown via simple wet/comfort/dry icons. It also logs min/max values, switches between F and C, and can sit on a desk or mount to a wall. Runs on a single AAA battery.
