Reed R5300 Continuity Tester

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed R5300 Continuity Tester

Manufacturer: Reed Instruments

Model: MEA-REE-00975

Availability: In Stock

Description

The REED R5300 is a lightweight continuity tester built for tracing and verifying cables and wire runs up to 10,000 feet long, using color-coded LED flashes (green/red) and an audible beeper to confirm connections and polarity. Its remote-probe design lets one person test a run alone, and the unit can hang directly from the alligator clips while working. Popular with electricians, alarm installers, and home-audio technicians for fast circuit verification.
