Reed R2800 Simulator, Temperature

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed R2800 Simulator, Temperature

Manufacturer: Reed Instruments

Model: MEA-REE-01032

Availability: In Stock

Description

A handheld temperature simulator that generates precise electrical output signals for 8 thermocouple types and multiple RTD types, used to verify and calibrate temperature meters, controllers, and data loggers. It includes internal cold-junction compensation and a large LCD display, and ships with test leads, alligator clips, and a thermocouple adapter.
