

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed R3100 Manometer, 100psi

Manufacturer: Reed Instruments

Model: MEA-REE-01084

Availability: In Stock

Description

The REED R3100 is a higher-range digital manometer measuring gauge and differential pressure up to 100 psi (150 psi max), with 0.1 psi resolution and about 0.3% full-scale accuracy. It supports the same 11 selectable pressure units and dual 4-digit LCD readout as other REED manometers, and is commonly used for HVAC troubleshooting, pneumatic and gas system checks, and testing filters, chillers, and pressure-relief devices. Its higher ceiling makes it the choice among this Reed manometer lineup for higher-pressure applications.
