Description

The REED R7100 is a dual-function tachometer that switches between laser photo (non-contact) and contact measurement modes, covering 2.5 to 99,999 RPM photo and 0.5 to 19,999 RPM contact. It ships with contact-tip adapters for measuring shafts and rollers directly, in addition to its built-in laser pointer for hands-free rotational speed checks. A clear 5-digit LCD display makes readings easy to view in the field.
