Reed R9905-Kit Air Quality Meter W/Calibration Humidity Standards

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed R9905-Kit Air Quality Meter W/Calibration Humidity Standards

Manufacturer: Reed Instruments

Model: MEA-REE-01708

Availability: In Stock

Description

The REED R9905-KIT is a data-logging indoor air quality meter that simultaneously tracks CO₂, temperature, and relative humidity on a triple LCD readout, plus computes time-weighted average and short-term exposure values. This kit adds two humidity calibration standards (33% and 75%) so you can verify and maintain the unit's accuracy in the field. It's well suited for checking HVAC performance and general indoor-air monitoring in offices, schools, and factories.
