Reed R2980 Probe, Type K, Oven/freezer, -112/392°f, -80/200°c

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed R2980 Probe, Type K, Oven/freezer, -112/392°f, -80/200°c

Manufacturer: REED INSTRUMENTS
Model: MEA-REE-01745
Availability: In Stock

Description

The R2980 is a Type K air-temperature probe purpose-built for monitoring ovens, refrigerators, and freezers, with a stainless-steel shielded tip that keeps the sensor from touching hot or cold surfaces and skewing the reading. It covers an unusually wide -112 to 392F (-80 to 200C) range thanks to its metal-braided, heat-resistant cable, and includes a mounting clip plus roughly 39 in of lead wire for positioning inside appliances. It's aimed at food-service and cold-chain technicians who need reliable ambient readings rather than surface contact readings.
