Reed R3000sd-Atc Probe, Atc For R3000sd & Sd-230

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed R3000sd-Atc Probe, Atc For R3000sd & Sd-230

Manufacturer: Reed Instruments

Model: MEA-REE-01747

Availability: In Stock

Description

The R3000SD-ATC is an Automatic Temperature Compensation probe designed to pair with REED's R3000SD and SD-230 data logging pH/ORP meters, improving reading accuracy by correcting for the effect of solution temperature on pH measurements. Per the instrument manual it covers roughly 32 to 149F (0 to 65C). It ships as a compact stainless-tipped probe on a coiled cable terminating in a mini-connector, matching the style of REED's other SD-series accessory probes.
