Reed R1420 Electrode Storage Solution, 16.9 Fl Oz. (500ml)

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed R1420 Electrode Storage Solution, 16.9 Fl Oz. (500ml)

Manufacturer: Reed Instruments

Model: MEA-REE-01770

Availability: In Stock

Description

The REED R1420 Electrode Storage Solution keeps pH and ORP electrode bulbs properly hydrated between measurements, preventing the drying-out that degrades response time and accuracy. Supplied in a 500ml bottle, it's formulated with reagent-grade ingredients and additives that inhibit microbial growth during storage. It also works to rehydrate an electrode that has previously dried out or been mishandled.
