Reed R9910sd Data Logging Air Quality Meter

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed R9910sd Data Logging Air Quality Meter

Manufacturer: Reed Instruments

Model: MEA-REE-01780

Availability: In Stock

Description

A handheld indoor air-quality data logger that tracks up to three plug-in probes at once, covering CO, CO₂, O₂, temperature, humidity, dew point and wet-bulb readings on a backlit dual LCD. Logged data writes straight to a removable SD card (expandable to 16GB) at sampling intervals from 1 second to 8 hours, so long unattended monitoring runs can be exported later as a spreadsheet without extra software. Well suited to checking ventilation and CO₂ buildup in schools, offices, and hospitals, with Max/Min and data-hold functions for spot checks. Ships as a kit with the humidity, CO, CO₂ and O₂ probes, carrying case and batteries.
