Reed R8085-Pc Pc Software For R8085

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed R8085-Pc Pc Software For R8085

Manufacturer: Reed Instruments

Model: MEA-REE-01790

Availability: In Stock

Description

REED R8085-PC is the companion Windows desktop software for the R8085 personal noise dosimeter, used to download logged exposure readings from the instrument and review, chart and export them on a PC. It runs on Windows XP through Windows 11 and is the tool referenced in REED's dosimeter kits for turning raw dose/level logs into shareable reports. This is a software-only accessory and requires the R8085-USB cable to connect the dosimeter to a computer.
