

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed R8085-Usb Usb Cable For R8085

Manufacturer: Reed Instruments

Model: MEA-REE-01791

Availability: In Stock

Description

The REED R8085-USB is the replacement USB interface cable used to connect the R8085 noise dosimeter to a PC for data retrieval, working alongside the R8085-PC software. It includes a USB driver disc and is compatible with Windows 7, 10 and 11; a small switch on the cable must be set to the correct position before the dosimeter will communicate with the software. It's sold as a standalone replacement part for kits that already include the R8085 dosimeter and software.
