SinoGnss AT350 Mini-Choke Ring Antennae

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

SinoGnss AT350 Mini-Choke Ring Antennae

Manufacturer: ERP Manufacturer #15

Model: SUR-SIN-01945

Availability: In Stock

Description

A compact choke-ring GNSS antenna covering GPS, GLONASS, BeiDou, Galileo and SBAS signal bands, with the concentric ring design that suppresses multipath reflections for cleaner carrier-phase measurements. Its small footprint makes it a cost-effective option for permanent reference stations and structural/security deformation-monitoring installations where a full-size choke-ring antenna would be impractical.
