Reed R2020-NIST IR Thermometer, Video Data Logger W/ Sd Card W/Nist Cert

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed R2020-NIST IR Thermometer, Video Data Logger W/ Sd Card W/Nist Cert

Manufacturer: Reed Instruments

Model: MEA-REE-02854

Availability: In Stock

Description

A video-logging infrared thermometer that pairs a wide-range non-contact sensor (rated up to roughly 3992F at 50:1) with a built-in color camera, so a reading can be captured alongside an actual photo or short video clip of the target. Captured images and clips save to onboard memory or an included SD card, and the unit also reports ambient temperature, humidity, dew point and wet-bulb readings. The NIST version adds a factory calibration certificate traceable to NIST for compliance record-keeping, with the same imaging and logging hardware as the standard model.
