Reed R2340-NIST IR Thermometer, Data Logger, 55:1, -58/3362°F, -50/1850°C W/Nist Cert

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed R2340-NIST IR Thermometer, Data Logger, 55:1, -58/3362°F, -50/1850°C W/Nist Cert

Manufacturer: Reed Instruments

Model: MEA-REE-02868

Availability: In Stock

Description

This is the NIST-certified version of REED's R2340 professional infrared thermometer, sharing the same 55:1 distance-to-spot ratio, -50C/1850C range, integrated Type K thermocouple input, and 999-point internal data logging as the standard model. It also reports ambient temperature, humidity, dew point, and wet-bulb readings, and runs on a rechargeable USB-C Li-ion battery rated for about 20 hours of use. The R2340-NIST additionally ships with a NIST-traceable calibration certificate, making it suitable for quality-controlled industrial environments where documented measurement accuracy is required.
