Reed C-370-NIST Thermometer, Rtd, -148/ 572°F, -100/300°C W/nist Cert

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed C-370-NIST Thermometer, Rtd, -148/ 572°F, -100/300°C W/nist Cert

Manufacturer: Reed Instruments

Model: MEA-REE-02869

Availability: In Stock

Description

The REED C-370-NIST is a precision RTD (resistance temperature detector) thermometer covering -100C to 300C (-148F to 572F), designed for applications needing tighter, more stable readings than a typical infrared or thermocouple probe. It works with PT-100, PT-500, and PT-1000 four-wire RTD sensors, has a waterproof IP67 housing, and displays readings on a backlit LCD with min/max/average tracking. This NIST-traceable version includes a calibration certificate, supporting food-service and other regulated environments where verified accuracy is required.
