Reed R2930-nist Probe, Type K, Surface, 90 Degree Angle, -58/932°F, -50/500°C, Yellow W/nist Cert

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed R2930-nist Probe, Type K, Surface, 90 Degree Angle, -58/932°F, -50/500°C, Yellow W/nist Cert

Manufacturer: REED INSTRUMENTS

Model: MEA-REE-02877

Availability: In Stock

Description

The R2930 is a 90-degree right-angle version of REED's Type K surface probe, letting the sensor tip contact a flat surface or duct wall while the handle and coiled lead stay clear of the hot zone, useful for tight or awkward mounting spots such as inside pipes or behind equipment. It shares the -58 to 932F (-50 to 500C) range and sub-2-second response time of the standard surface probe, with the same yellow K-type plug. The -NIST edition includes a NIST-traceable calibration certificate for documented accuracy.
