# Reed Tp-01-nist Beaded Wire Probe, Type K, -40/482°f, -40/250°c W/nist Cert

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

## Product Overview

**Manufacturer:** REED INSTRUMENTS
**Model:** MEA-REE-02883
**Availability:** In Stock

## Description

A basic beaded-tip Type K wire probe intended for everyday spot-checks with any Type K meter or thermometer, color-coded per ANSI thermocouple convention for easy polarity identification. It measures from -40 to 482F (-40 to 250C) and responds quickly thanks to its small exposed bead junction, making it a low-cost general-purpose sensor for HVAC, maintenance, and lab use. The -NIST version is the same probe supplied with a NIST-traceable calibration certificate.
