# Reed R6050SD-NIST Data Logging Thermo-Hygrometer W/Nist Cert

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

## Product Overview

# Reed R6050SD-NIST Data Logging Thermo-Hygrometer W/Nist Cert

**Manufacturer:** Reed Instruments

**Model:** MEA-REE-02894

**Availability:** In Stock

## Description

Handheld thermo-hygrometer with a probe on a coiled cable that reads ambient temperature, relative humidity, dew point and wet-bulb temperature, plus contact temperature via an included J/K thermocouple input. Logged data is written straight to an SD card at selectable intervals from 1 second to an hour, so readings can be pulled off as an Excel-ready file without separate software. The NIST version pairs this same R6050SD meter with a traceable calibration certificate.
