Reed BX-500-NIST Calibrator, Infrared Thermometer 122/932°F, 50/500°C W/Nist Cert

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed BX-500-NIST Calibrator, Infrared Thermometer 122/932°F, 50/500°C W/Nist Cert

Manufacturer: Reed Instruments

Model: MEA-REE-02992

Availability: In Stock

Description

The Reed BX-500-NIST is a portable blackbody-style calibrator for checking non-contact infrared thermometers and thermal imagers across a range of 122-932F (50-500C), supplied with a NIST calibration certificate. Its wide-aperture target and contact RTD reference compensate for optics variation between different IR thermometer models, and desired setpoints can be dialed in in 0.1-degree increments. Simply aim the IR thermometer at the calibrator's target once it reaches equilibrium to verify a reading.
