Reed R2810-nist Thermocouple Calibrator, Temperature W/nist Cert

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Manufacturer: REED INSTRUMENTS
Model: MEA-REE-02994
Availability: In Stock

Description

The REED R2810-NIST is a handheld thermocouple calibrator that can both source and measure eight thermocouple types (R, S, B, E, K, J, T, N) plus millivolt signals, making it suited for checking meters, controllers, transmitters and data loggers. It offers built-in cold-junction compensation, a large easy-to-read display, and a basic accuracy around 0.05%, with a quick-zero button and auto power-off to extend battery life. The kit ships with test leads, alligator clips, a thermocouple adapter and a protective holster, and this unit is supplied with a NIST-traceable calibration certificate for verified accuracy.
