Reed R9030-NIST Hardness Tester, Pen W/Nist Cert

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed R9030-NIST Hardness Tester, Pen W/Nist Cert

Manufacturer: Reed Instruments

Model: MEA-REE-02996

Availability: In Stock

Description

The REED R9030-NIST is the same pen-style Leeb hardness tester as the standard R9030, using a universal D impact device to give quick, portable hardness readings across seven scales (Rockwell HRC/HRB/HRA, Brinell, Leeb, Vickers and Shore) on metals such as steel, aluminum, bronze and cast iron. It features a rechargeable battery good for around 40 hours of operation, an OLED display, and internal memory that logs hundreds of measurements for later review. This version includes a NIST-traceable certificate of calibration for applications requiring documented measurement accuracy.
