Complete kit build of the R7000SD data logging vibration meter, bundling the meter with a vibration probe, a 16GB SD memory card, an AC power adapter for continuous long-term monitoring, and a hard carrying case. It measures velocity and acceleration on rotating equipment to flag developing mechanical problems, and can record readings automatically over time for later review in a spreadsheet. Well suited to technicians who want a ready-to-use monitoring setup without sourcing accessories separately.
