Reed R7950/12 Ultrasonic Couplant Gel 8.45oz (250ml), 12-Pack

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

Reed R7950/12 Ultrasonic Couplant Gel 8.45oz (250ml), 12-Pack

Manufacturer: Reed Instruments

Model: MEA-REE-03018

Availability: In Stock

Description

A case pack of twelve 8.45 fl oz (250ml) applicator bottles of REED's ultrasonic couplant gel, the same slow-drying, water-soluble formula used to couple ultrasonic thickness gauge transducers to iron, steel, aluminum and titanium surfaces. Its cling keeps it in place on overhead and vertical surfaces, making it practical for bulk use across fleets of gauges or busy inspection teams.
