SinoGnss AT360 Geodetic Antenna

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

SinoGnss AT360 Geodetic Antenna

Manufacturer: ERP Manufacturer #15

Model: SUR-SIN-03227

Availability: In Stock

Description

A full-constellation, triple-frequency survey antenna that tracks GPS, GLONASS, BeiDou, Galileo, QZSS, IRNSS, SBAS and L-Band signals for precise positioning work. Its low-noise amplifier and stable phase center deliver millimeter-level accuracy and strong signal tracking even at low satellite elevation angles, while the sealed IP67-rated housing withstands dust, rain, and rough field handling. Compact at about 147mm across and under 500g, it suits land survey, construction, precision agriculture, and structural deformation-monitoring setups that need a dependable external GNSS antenna.
