Description

Muya G6 GNSS RTK receiver is more than a universal 1408-channel multi-band IMU-RTK GNSS receiver, it is the perfect GNSS RTK survey tool that any surveying, construction or mapping professional has come to expect. Built-in connectivity modules such as Wi-Fi, Bluetooth, NFC, UHF and 4G modem can be used reliably, efficiently and conveniently in a variety of application scenarios to meet any job site configuration. Multiple constellation and frequency tracking, powerful RTK engine, calibration-free tilt compensation IMU technology makes G6 receiver easy to get fixed solution in most demanding environments, brings you to focus on your surroundings and not the bubble to measure the points that ...
