SinoGnss Venus Laser GNSS RTK Receiver Kit Incl. Internal GSM Modem With Controller

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

SinoGnss Venus Laser GNSS RTK Receiver Kit Incl. Internal GSM Modem With Controller

Manufacturer: ERP Manufacturer #15

Model: SUR-SIN-03380

Availability: In Stock

Description

The Venus is ComNav's compact rodless RTK receiver, using a built-in laser rangefinder so a surveyor can shoot a point without physically holding a pole over it, in addition to normal pole-mounted GNSS operation. At only 380g and IP67-rated, it tracks 50+ satellites, connects via Bluetooth 5.0 and NFC, and includes an internal GSM modem plus controller in this kit for network RTK corrections in the field. It delivers roughly 8mm+1ppm horizontal RTK accuracy and around 20 hours of runtime per charge.
