GNSS UHF Antennae QT450AE 450-470Mhz

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

GNSS UHF Antennae QT450AE 450-470Mhz

Manufacturer: ERP Manufacturer #15

Model: SUR-SIN-03955

Availability: In Stock

Description

This is a flexible whip-style UHF antenna tuned to the 450-470MHz band commonly used for RTK radio datalinks, with roughly 4dBi of gain and a threaded TNC connector for direct mounting on a receiver or radio housing. It is a lightweight accessory antenna meant to extend and stabilise UHF radio range between a GNSS base and rover during conventional radio RTK surveying. Its compact, low-profile design makes it easy to pack alongside a receiver kit without adding much bulk.
