SinoGnss Electric Steering Wheel for AG501 Pro Autosteer System

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

SinoGnss Electric Steering Wheel for AG501 Pro Autosteer System

Manufacturer: ERP Manufacturer #15

Model: PRE-SIN-04441

Availability: In Stock

Description

This SinoGNSS-branded electric steering wheel is the actuator module of ComNav's autosteer kit, mounting onto the tractor's steering column to physically execute GNSS-guided steering commands. It works together with a GNSS tablet, angle sensors, and dual GNSS antennas as a plug-and-play package, supporting straight, curved, automatic U-turn, and pivot steering modes for tasks like planting, spraying, and harvesting. Its self-contained motor housing carries the SinoGNSS badge and integrates directly into the vehicle's existing steering assembly.
