Description

The MUYA WT311 Surface Resistance Meter is built for anti-static (ESD) compliance checks, measuring surface resistance across a very wide range from roughly 100 ohms up to 1.5×10^{12} ohms. It displays three resistance readings at once along with ambient temperature (0-50C), giving a fast, well-rounded picture of a work surface's static-dissipative properties. A backlit LCD, data-hold function, and automatic shutdown round out this pocket-sized instrument for ESD-controlled workspaces.
