MUYA WT8811 Compound Gas Monitor

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

MUYA WT8811 Compound Gas Monitor

Manufacturer: Muya
Model: MEA-MUY-04481
Availability: In Stock

Description

The MUYA WT8811 Compound Gas Monitor is a four-in-one safety instrument that simultaneously tracks oxygen (O₂), carbon monoxide (CO), hydrogen sulfide (H₂S), and combustible gas (LEL) levels for confined-space and industrial safety work. Its color screen and bilingual interface show all four readings at a glance, while built-in sound, light, and vibration alarms warn of dangerous concentrations. The monitor logs up to 120,000 readings and runs on a rechargeable battery, suited to extended field use in petrochemical, mining, and utility settings.
