MUYA GT8916 Hot Wire Anemometer

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

MUYA GT8916 Hot Wire Anemometer

Manufacturer: Muya
Model: MEA-MUY-04492
Availability: In Stock

Description

The MUYA GT8916 is a hot-wire anemometer built for precise low-speed airflow measurement in HVAC ducts, cleanrooms, and ventilation testing where a vane-type sensor is too coarse. Its slim thermal-sensor probe picks up subtle air movement and reports both instantaneous and average wind speed alongside temperature, making it well suited to indoor air-balancing work. It's a compact, battery-powered complement to MUYA's vane-style anemometers for jobs needing finer sensitivity at lower velocities.
