MUYA GT8907 Anemometer

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

MUYA GT8907 Anemometer

Manufacturer: Muya
Model: MEA-MUY-04494
Availability: In Stock

Description

The MUYA GT8907 is a vane-type digital anemometer that measures wind speed, air volume, temperature, and humidity for HVAC, workshop, and general environmental monitoring. It captures current, average, maximum, and minimum airflow via an extendable rotating vane sensor, with readings expressed in CFM or CMM. A USB connection with companion software lets readings be logged and reviewed on a computer, and the unit runs on standard AAA batteries with auto shut-off.
