MUYA GM620 Wood Moisture Meter

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

MUYA GM620 Wood Moisture Meter

Manufacturer: Muya
Model: MEA-MUY-04496
Availability: In Stock

Description

The MUYA GM620 is a pin-type digital wood moisture meter built for carpenters, timber buyers, and flooring installers who need a fast, non-destructive moisture check. It measures wood moisture content across roughly a 2-70% range in under a second, with a resolution of 0.5% and about 1% accuracy, displaying results on a simple LCD screen. The probe pins are inserted directly into the wood surface, making it handy for job-site checks of lumber, firewood, or framing before installation.
