MUYA GT5306A Insulation Resistance Tester

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

MUYA GT5306A Insulation Resistance Tester

Manufacturer: Muya
Model: MEA-MUY-04506
Availability: In Stock

Description

The MUYA GT5306A is a digital insulation resistance tester (megohmmeter) used to check whether cable, motor, and equipment insulation is sound before an electrical circuit is energized. It applies switchable DC test voltages and displays results on an easy-to-read LCD, quickly flagging weakened or moisture-damaged insulation that could otherwise lead to shock or fire risk. Compact and battery-powered, it's built for routine electrical safety checks by installers and maintenance staff.
