

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

MUYA GT67 Wire Tracker

Manufacturer: Muya
Model: MEA-MUY-04511
Availability: In Stock

Description

The MUYA GT67 is a wire/cable tracer kit consisting of a tone generator and an inductive probe, used to locate and identify a specific telephone, network (RJ11/RJ45), or low-voltage cable among a bundle or trace it behind a wall. It also checks basic line conditions such as continuity, line voltage, and short circuits, helping installers avoid cutting or connecting to the wrong cable. It's a practical tool for structured cabling and telecom installation work.
