MUYA GT5101-2kPa Pressure Manometer

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

MUYA GT5101-2kPa Pressure Manometer

Manufacturer: Muya
Model: MEA-MUY-04513
Availability: In Stock

Description

The MUYA GT5101-2kPa is a handheld digital manometer that measures gas or air differential pressure up to 2kPa, commonly used to check duct pressure, filter drop, or airflow balance in HVAC systems. It offers a zero/tare function and typically switches between multiple pressure units (Pa, kPa, mmH₂O, etc.) for compatibility with different technical standards. Its compact, battery-powered design makes it convenient for on-site HVAC and ventilation diagnostics.
