MUYA MG-pro Grain Moisture Meter

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

MUYA MG-pro Grain Moisture Meter

Manufacturer: Muya
Model: MEA-MUY-04515
Availability: In Stock

Description

The MUYA MG-pro is a handheld pin-type grain moisture meter used to check the moisture content of harvested grains such as wheat, maize, rice, and soybeans before storage or sale, helping prevent spoilage or mold from grain that's too wet. It gives a direct percentage moisture reading on its display, generally across a range suited to typical grain moisture levels, with a design intended for quick spot checks in the field or at a grain store. It's aimed at farmers, millers, and grain traders who need a fast go/no-go moisture check.
