MUYA GM1365 Humidity & Temperature Data Logger

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

MUYA GM1365 Humidity & Temperature Data Logger

Manufacturer: Muya
Model: MEA-MUY-04527
Availability: In Stock

Description

A rugged USB data logger that continuously records both temperature and relative humidity, with a built-in LCD so current readings can be checked on the spot without a computer. It plugs straight into any USB port to download its log history and can auto-generate a report, with adjustable recording intervals, thousands of stored readings, and programmable high/low alarms backed by LED and buzzer warnings. Built for monitoring temperature- and humidity-sensitive goods in transit or storage, such as cold-chain shipments or warehoused stock.
