MUYA GM795 Soil PH Meter

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

MUYA GM795 Soil PH Meter

Manufacturer: Muya
Model: MEA-MUY-04530
Availability: In Stock

Description

A dedicated soil pH tester built on the same rugged pen-style body as Muya's water pH meters, but fitted with a pointed metal probe made for pushing directly into soil. Its color display reads out soil pH together with temperature, and a CAL button handles quick calibration before use in the garden, greenhouse, or field. A practical check for gardeners and small-scale growers wanting to confirm soil acidity/alkalinity before planting or fertilizing.
