MUYA HD8906 Tachometer

Professional detailed product specification sheet

This document presents a professional product overview including brand details, availability, specifications, and descriptive information for reference, sales support, and catalog-style distribution.

Product Overview

MUYA HD8906 Tachometer

Manufacturer: Muya
Model: MEA-MUY-04534
Availability: In Stock

Description

A contact-type tachometer that reads RPM directly from a rotating shaft using a contact-tip adapter pressed against the shaft end, complementing Muya's non-contact laser model for jobs where a reflective marker isn't practical. It shares the same rugged handheld body, backlit LCD, and MEM/power/light controls as the non-contact version for quick, familiar field use. Suited to measuring engine, motor, or machine-tool spindle speeds during maintenance and diagnostics.
